

SERVING DATA CENTRES

SUPPORTING OPERATION OF IT APPLICATIONS BY IMPROVING
THE RELIABILITY AND ROBUSTNESS OF YOUR PROCESSES

Hosting companies, private and public IT departments, telecoms sites, etc.

We work with you day to day to ensure continuity of service in your server rooms.

Our support leaves you free to concentrate on the essentials: data protection, equipment operation and managing your energy use.

VINCI Facilities provides tailored solutions and manufacturing-sector methods for your data centres, guaranteeing you:

- Energy infrastructure availability and resilience
- Energy efficiency for your installations
- Server room support
- Adaptation to changes in IT

INFRASTRUCTURE AVAILABILITY AND RESILIENCE:

- Operations consultancy
 - Audits (power usage effectiveness, capacity, tiering)
 - Availability analysis
- Multi-technical maintenance
- Data centre operation & FM
- Multi-year CAPEX plan

SERVER ROOM SUPPORT

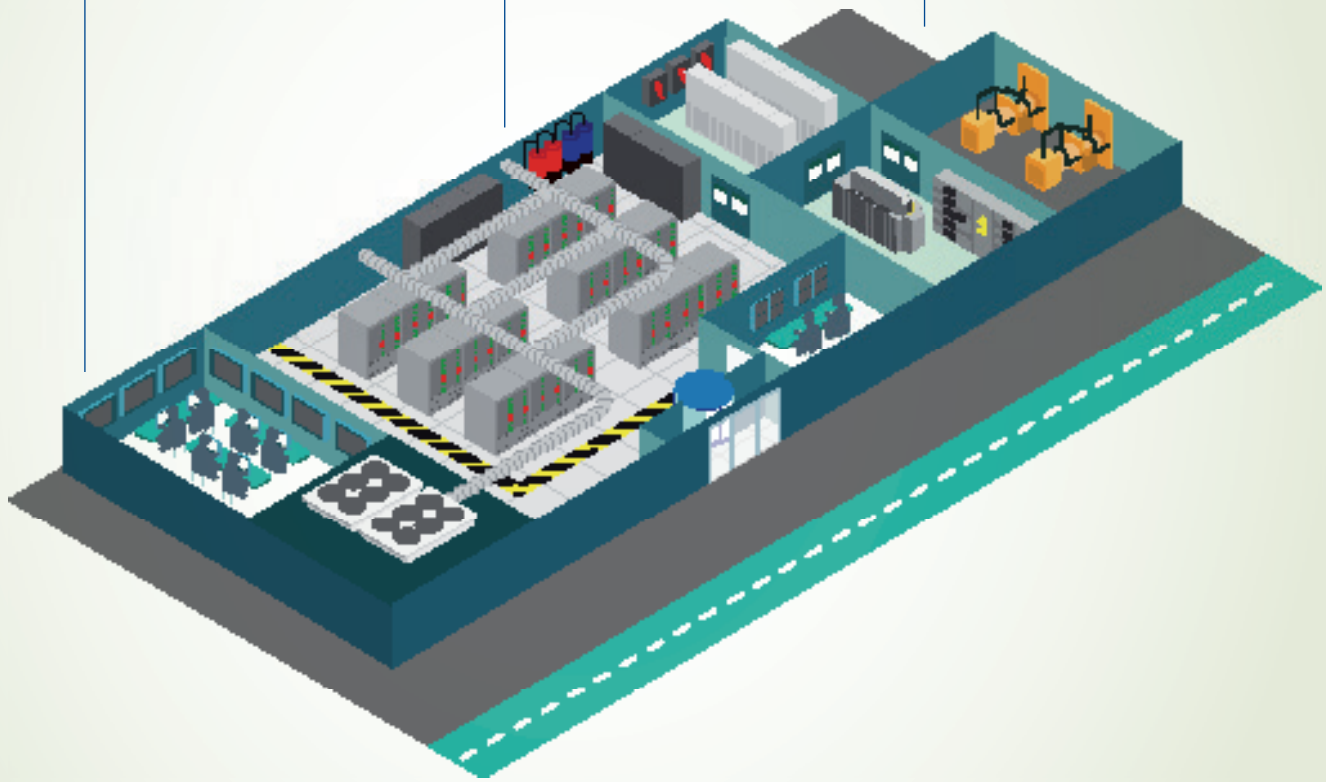

- Insertion into the built environment
- Local operations
- Server room decontamination
- Particle counting

ENERGY EFFICIENCY

- PUE audit and tracking
- Insertion into the built environment

ADAPTATION TO CHANGES IN IT

- Capacity audit and tracking
- Lifecycle management
- Related works
